IsatPhone Pro from Stratos Inmarsat's First Global Handheld

In June 2010, Stratos begins offering the rugged IsatPhone Pro, Inmarsat's first global handheld that is optimized and designed specifically for the I-4 satellite network. The phone has been designed for professional users in the government, aid, media, oil and gas, mining and construction sectors but will undoubtedly appeal to a wide range of users.

Features

The IsatPhone Pro is feature-rich and supports:

- Satellite telephony
- Voicemail
- Text and email messaging
 - Text-to-text
 - Text-to-email
 - Web message-to-IsatPhone
- Industry-leading battery life
- GPS location data – view position and text
- Bluetooth for hands-free use

- Wired hands-free headset
- Wrist strap
- Quick Start Guide (8 languages)
- Warranty
- Support CD

Text messages come with predictive text which supports Arabic, Chinese, English, French, Japanese, Portuguese, Russian and Spanish. Also bilingual keypads are available in Russian, Arabic, Chinese and Japanese.

IsatPhone Pro provides the ultimate combination of a robust handset (IP54) that is easy to use, with an extremely long battery life, a reliable network connection with clear voice quality and global coverage. The location data feature can be used as an "emergency button" and is a great tool as an extra layer of security for companies with remote personnel.

Hardware

The IsatPhone Pro comes standard with:

- Handset
 - Battery
 - 3 chargers including international plug kit, car charger and PC charger (via micro USB cable)

Accessories

There will be a range of high quality docking stations available to enable the use of the handset indoors, in a vehicle or at sea.

Other accessories such as Bluetooth handsets and solar chargers are also offered by Stratos.

Coverage

The IsatPhone Pro is available on a global basis over the Inmarsat-4 satellite network which will have an operational life well into the 2020's.

Airtime Packages

Stratos offers highly attractive IsatPhone Pro postpaid and prepaid plans.

Postpaid Plans

Month-to-month, "pay as you go" plans as well as the option of choosing a 20 or 60 minute bundle plan are available. As added flexibility, the bundle plans can also be spread over a quarterly or yearly basis.

Prepaid Plans

Plans based on vouchers which range from 25 to 5,000 units where 1 unit represents 1 calling minute to PSTN. Vouchers of 100 or more units also include bonus units. All vouchers are valid for 730 days to make sure users do not lose their units! Vouchers can be conveniently loaded and topped up online via Stratos Dashboard. End users can also do top ups themselves via credit card in Stratos Dashboard and receive balance alerts when certain thresholds are reached.

GSPS SIM cards

There is one type of SIM card for GSPS, to be used with the IsatPhone Pro that can be activated either as postpaid or prepaid.

Stratos also can provide customized SIM cards that come with the Channel Partner name, telephone number and/or email address that will display on the phone's screen. SIM locking by the Channel Partner is also an available option.

The Stratos Advantage

IsatPhone Pro users receive complimentary access to Stratos Dashboard, the industry-leading, online system for instant provisioning, cost and credit management. Stratos Dashboard also provides reporting options, detailed traffic management and billing information through different access levels.

Inmarsat Satellite Phone Services (SPS) Migration

Inmarsat will not discontinue the SPS-based services until global variants have been launched to replace them. Inmarsat has committed to support the SPS service until at least 2011. It is important to note though that SPS terminals are not being produced anymore and SPS SIM Cards will **not** be supported in IsatPhone Pro handsets and vice versa.

Where to Buy

E³ Systems

StratosELITE Partner

e3 are specialists in advanced marine electronic systems – from concept through construction to cruising, refit and repair, equipment or service, training and global annual support.
