

It's World Cup Year!

..and don't forget the Grand Prix, French Open, US Open, Wimbledon, Ryder Cup, Commonwealth Games, World Series and more.

Make sure your owners and guests don't miss a match and can stay in touch with family and friends.

Stay connected with e³

Getting the TV and Internet right onboard has gone from being an interesting novelty a few years ago to being an essential part of any guest or owner charter.

Just ask any captain who has got it wrong!

2010 is a big year in the sporting calendar and e³'s years of experience mean we are the first choice for many yachts to advise on what you can watch, where and in what language.....and we can get it all up and working!

Satellite TV – so you don't miss a kick!

We have an unrivalled selection of digital TV services to suit your guests in their own language.

We can recommend the best service for your cruising area so you don't end up buying a package you can't watch. For example, the World Cup will only be shown live on Sky or Freeview on BBC and ITV in the footprint shown top right. Thus if you plan to cruise outside this area then you will need to prepare another service using Hotbird – the coverage is shown to the right. Alternatively you can use an IPTV service such as The Jetstream – as shown bottom right.

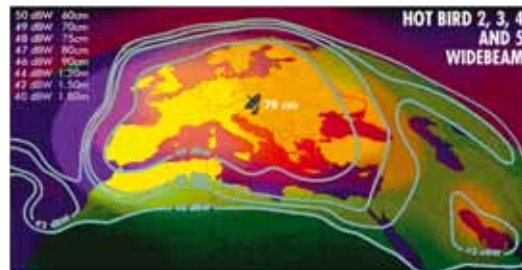

We have a dedicated support team with many years experience in maritime TV troubleshooting. They can solve contract problems and offer expert technical advice from the decoder to the stabilised antenna.

We provide support on ALL the components of your TV system - whenever and wherever you need it.

Access your World Cup TV channels from anywhere in the world using The Jetstream – the first private, full service interactive media delivery platform

The Jetstream technology runs through a super video highway that enables customers to view their favourite television channels around the world – regardless of where you may live or travel. With a reasonable quality broadband connection your media is at your finger-tips with full functionality on any TV package you subscribe to.

e³ is an official JETSTREAM supplier so we can make this available on your yacht and elsewhere using our premium VSAT broadband and 3G & HSPA services.

We offer VSAT services that will support The JETSTREAM so you can watch your TV with no nasty surprises in the most off the beaten track locations.

Exclusively, we now offer short term contracts for The Jetstream which is ideal for the charter market.

High Speed, Unlimited Broadband... keeping your guests connected.

e³ offers two solutions which can help keep you connected.

- The **e³ VSAT** platform, powered by MTN – The only choice for applications such as JETSTREAM, Video Conferencing and Skype. **e³ VSAT** customers also get preferential support, special upgrade offers, a basket of other integrated applications, annual support and training.
- 3G from Cadiz to Trieste – €270 per month unlimited data using the **e³ 3G** service. This unique and hugely popular service from e³ Systems has many new improvements for 2010 with the following market beating features:
 - Six month contracts.
 - Can be taken by country as €90 per month per country
 - 10GB per month of HSPA data on Vodafone Spain
 - No 'top ups', single point of contact for billing, roaming and no-roaming options available
 - Unique 3G roaming warning device, service selector and manager, the **e³ DSC** now available

Support

All the above options are available with the full support of the e³ Systems technical team who are on hand close by in Palma, Barcelona, Malta and Antigua and also through our worldwide Partner network with key offices in Antibes, Monaco and Viareggio for 2010.
